

FREQUENTLY ASKED QUESTIONS
LEANDER® CRADLE

201702

QUESTIONS

ANSWERS

Functionality

What is special about the Leander® cradle compared to other cradles?

Single suspension point provides free movement, like the movement inside the womb.

What does the single suspension point mean for my child?

The calm movement stimulates the child's development, and motor and creative senses.

How long can my child use the cradle?

The cradle is suitable for babies aged between 0-6 months, or until your child can sit unaided. Tested and approved for 10 kg.

Design

How do I assemble the cradle?

The cradle is suspended from a ceiling hook or in a stand.

Can I move the cradle?

The cradle can be moved from room to room, using ceiling hooks in different rooms.

What does the cradle's design mean for my child?

The cradle's movements and oval shape create a calm and secure universe for your baby.

What is the cradle made of?

The cradle consists of a steel frame and cotton fabric, while the stand is made of aluminium.

Accessories

What does it include?

The cradle includes a ceiling hook and a cold foam mattress.

Which accessories are available?

A stand, extra hooks, oval top mattress, fitted sheets and canopy can all be purchased as extra accessories.

Can I use another mattress?

No. The cold foam mattress matches the cradle's oval shape and ensures optimum comfort and ventilation for your child.

Can I wash the cradle?

The fabric on the cradle, mattress cover and canopy is washable at 60°C.
The assembly instructions at www.leander.com show how to dismantle the cradle bag.
