

FREQUENTLY ASKED QUESTIONS
LINEA BY LEANDER®
CHANGING UNIT

201711

QUESTIONS

ANSWERS

Functionality

Has the changing unit more than one position?

Yes. The changing unit has two depth positions, so the changing unit can be aligned with the dresser or moved further forward to avoid too much space wasted behind the dresser.

How long can we use the changing unit?

The changing unit has been approved for use up to 15 kg.

Design

Why has the changing unit high edges?

The relatively high edges are added to prevent the child from rolling over the sides. However, never leave your child unattended!

Does the changing unit come with any storage facilities?

Yes. The changing unit is mounted on the Linea by Leander® dresser, so there are three roomy drawers and a large changing unit with space for storage.

Do you have to make holes in the dresser to mount the changing unit?

No. The changing unit is mounted on the dresser without making holes. When the time for nursing is over, you still have a beautiful drawer for the nursery, hall or living room.

What is the changing unit made of?

The changing unit is made of veneers in beech and covered with either oak or beech and surfacetreated with a strong lacquer. The lacquer is EN71-3 approved.

Accessories

What is included?

4 white brackets for mounting the changing unit on the dresser is included.

Which accessories are available?

We recommend Matty as changing mat - it fits perfect to the changing unit and it is easy to clean. Matty is available in 4 different colours.
