LINEA SIDE-BY-SIDE BED

SIDE-BY-SIDE BED WITH UNIQUE FEATURES

"The light in the bedroom is out and you have just fallen asleep. Then you sense that your baby is moving. Without turning on the light, you click down the side of the bed and gently caress your baby's belly. Your baby senses your presence and returns safely to dreamland. As do you. With the side-by-side bed you are close to your baby throughout the night. Intimacy and peace create a good ambience for the night."
